Re: Wastewater Treatment Plant – Facilities Operation Report.

The Village’s Facility treated on average 2,240,000 gallons per day in December. New York State Discharge Permit {NYS-SPDES} limits were met over the period. Below are the projects completed and other significant notes. Daily operations/maintenance activities conducted as scheduled.

***Projects and significant events of record.***

- Composting operation processed 11.885 tons processed.
- Removed 16 cubic feet of grit from influent.
- Greased all equipment.
- Cleared blockages in the methane system.
- Replaced ferric chloride pump “o” rings.
- Repack thickener bldg. moyno pump.
- EPA – conducted independent sampling of compost for analysis.
- Replaced wheels on belt press conveyor that showed excess wear.
- Repaired air switch on Belt press.
- Stripped and waxed floors in the main building.
- Completed lab evaluation for compost analysis. Will utilize Mid-State Labs going forward.
