Response Report

September- 232 Total Responses

October- 210 Responses as of this morning

1. The new plow is being installed and the old one will be able to go to surplus for auction.
2. Austin will be graduating the Fire Academy on November 10th, then he will return to his crew.
3. The guys have been doing a great job running multiple calls, many of them critical and many of them overlapping (3 and 4 calls at the same time).
4. I am at the academy for the week as I was accepted into the Instructors Authorization Training Program. Once this concludes, I will be able to teach Fire Officer 1. It is my hope to teach this class to all our staff in 2023. This class is the first of the officer series which teaches the basics of leadership, incident command, critical decision making and much more. Many times, due to the make up of our department, someone other than an officer may be put into the position to “act” as an officer and this class will give them some of the tools and confidence necessary.
5. I would ask the mayor sign a letter requesting the firefighter list. I would like to give a second interview to a couple of the candidates we interviewed before to possibly fill 1 or 2 of our open positions.
6. I have 2 callmen prospects, both who may pursue a career here. I will likely interview them early/mid November. I will send an email out when I have a date and time.
